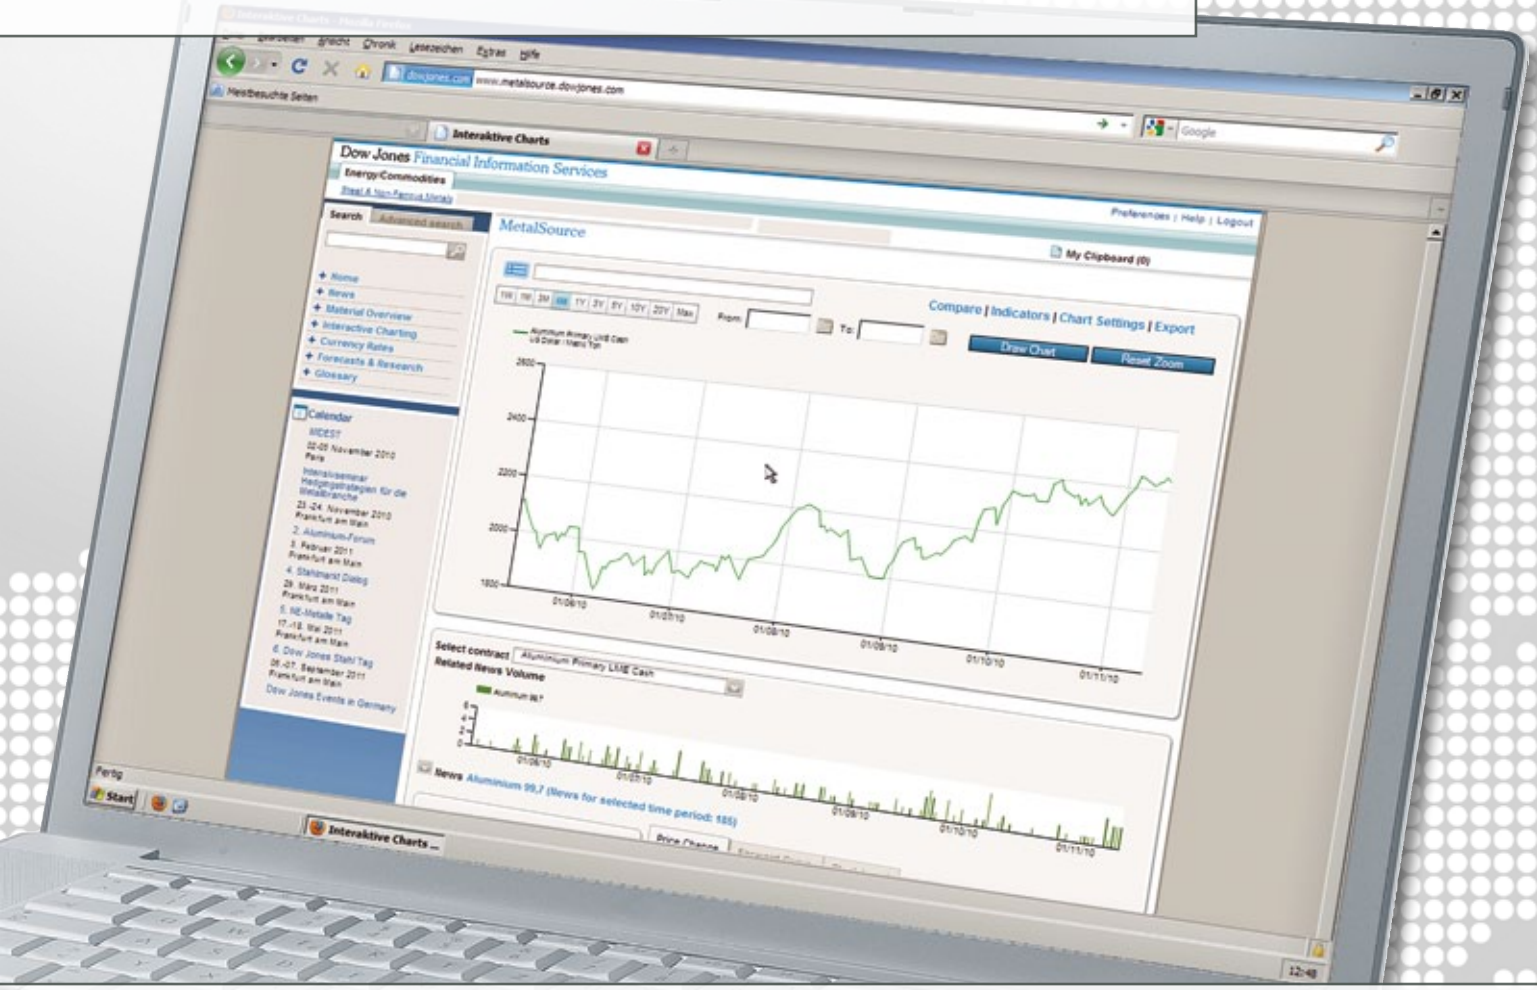
Quick User Guide



Dow Jones **MetalSource**

DOWJONES
A NEWS CORPORATION COMPANY

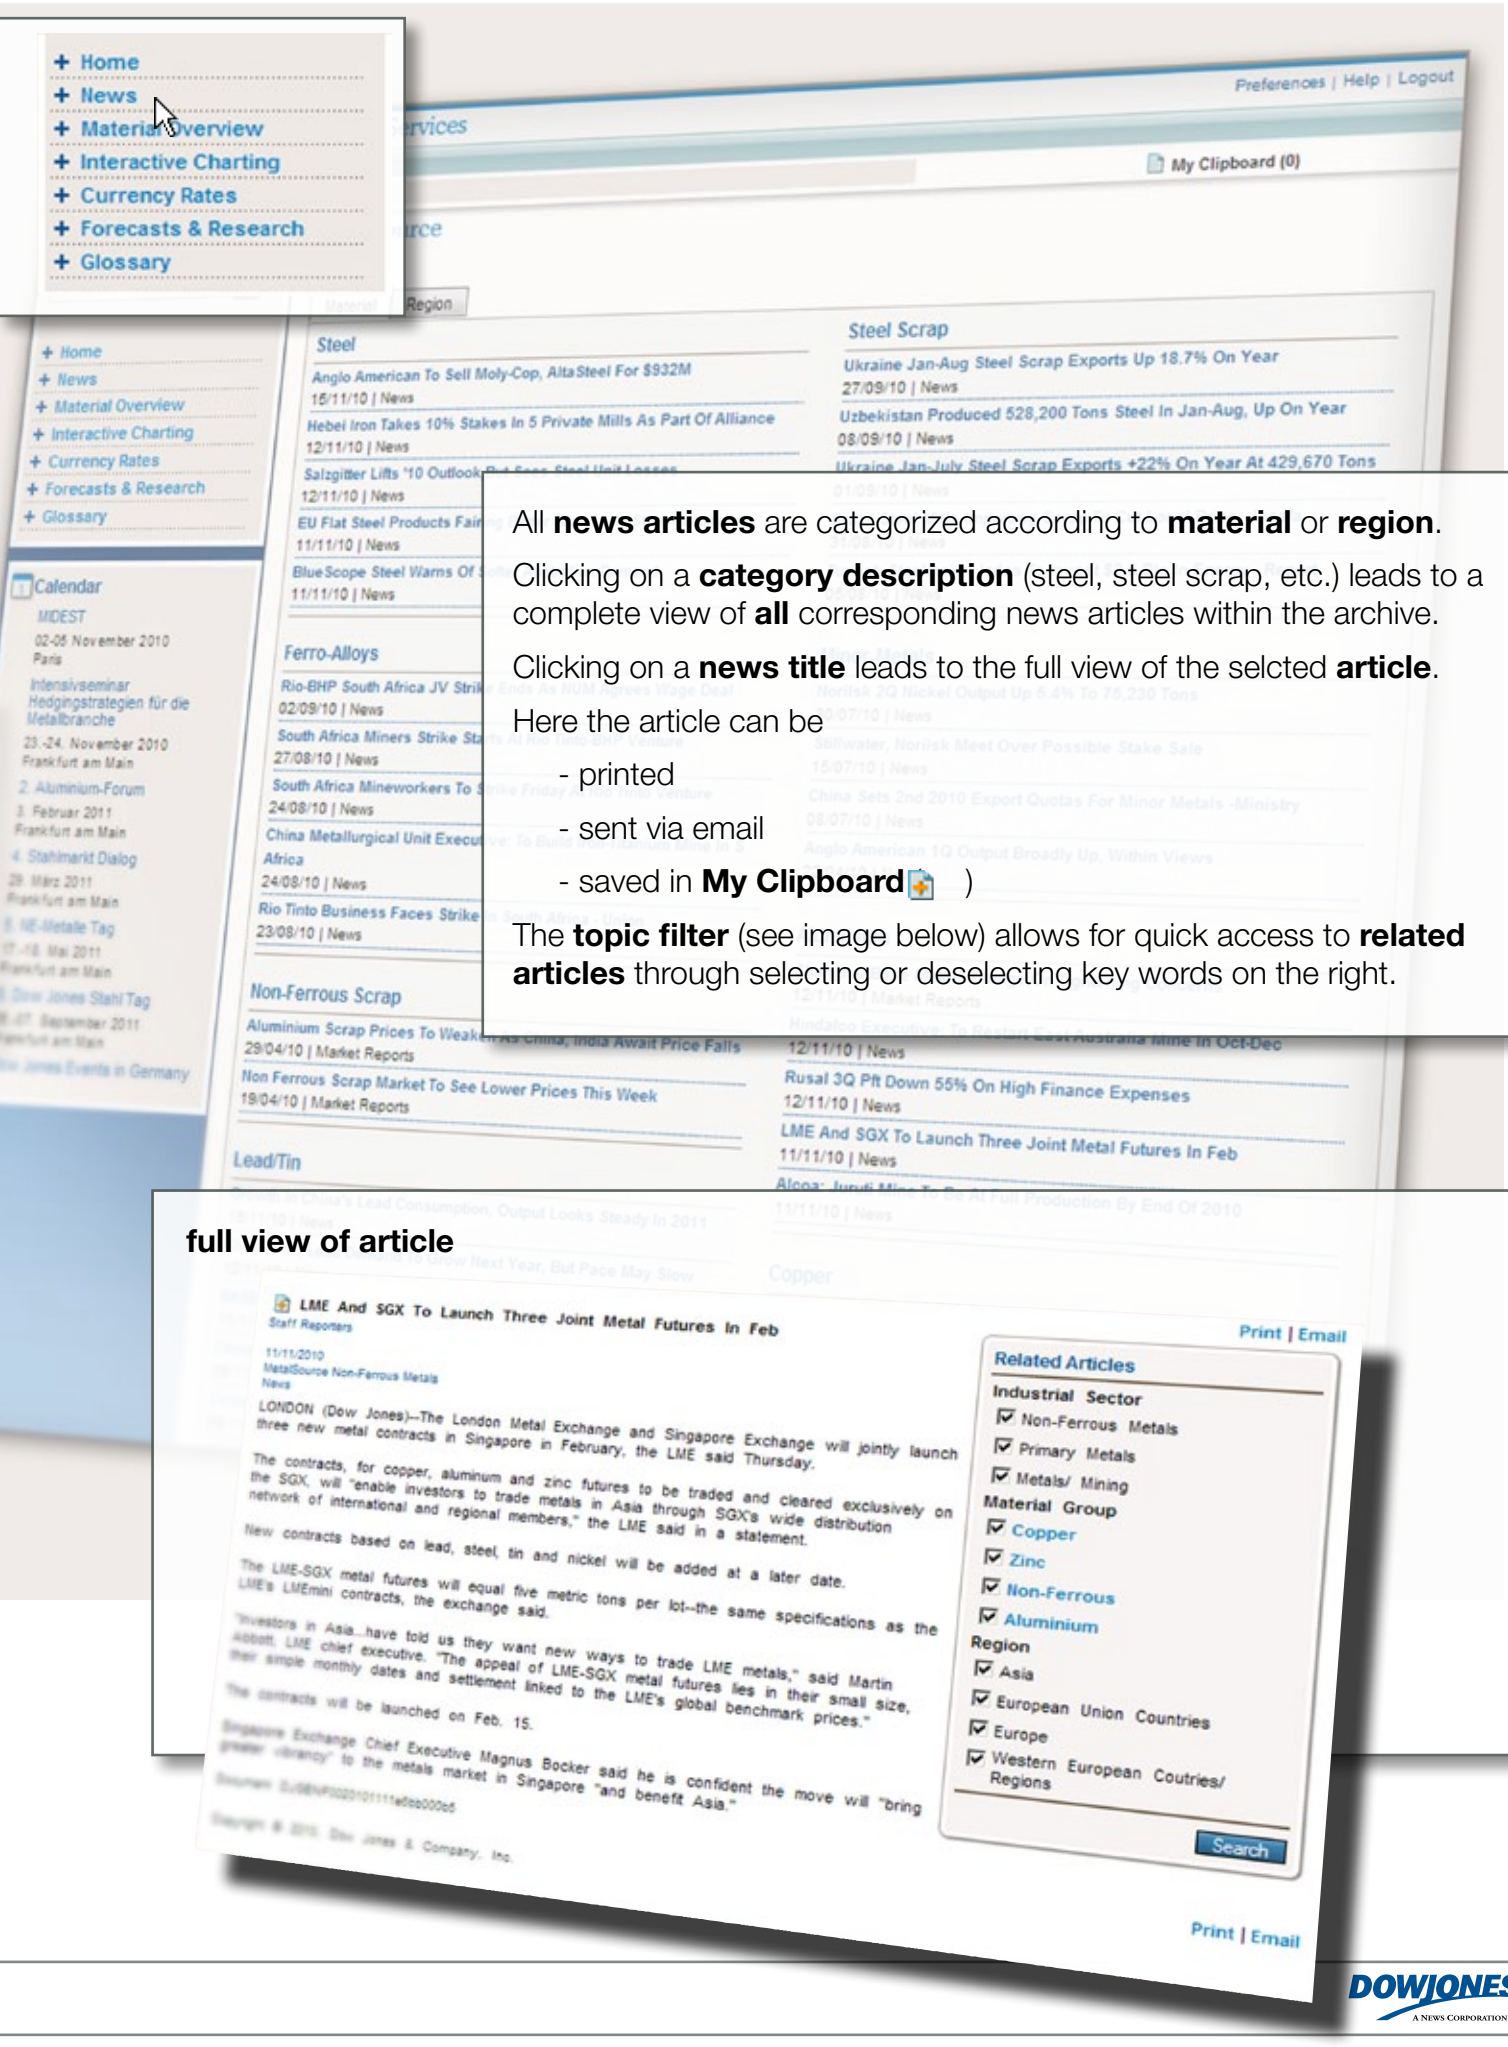
The homepage of **Dow Jones MetalSource** gives you an overview of all current **news items** and selected **material prices** - including recent **market fluctuations**.
By selecting a news title or the name of a material you are led to a full view of the **article**.

In the top left you find the MetalSource's **Main Navigation** menu.
Here you can research **news stories** and **pricing data**, configure detailed **price charts**, make **currency conversions**, view **market prognoses** and use the **glossary**.

Two **search functions** are available for selecting research within the archive.

Free Text Search - Enter subject, click magnifier.

Advanced Search - Set filter criteria (material, subcategory, type of article, region, branch, time frame, etc.) and click search.



All **news articles** are categorized according to **material** or **region**.

Clicking on a **category description** (steel, steel scrap, etc.) leads to a complete view of **all** corresponding news articles within the archive.

Clicking on a **news title** leads to the full view of the selcted **article**.

Here the article can be

- printed
- sent via email
- saved in **My Clipboard**)

The **topic filter** (see image below) allows for quick access to **related articles** through selecting or deselecting key words on the right.

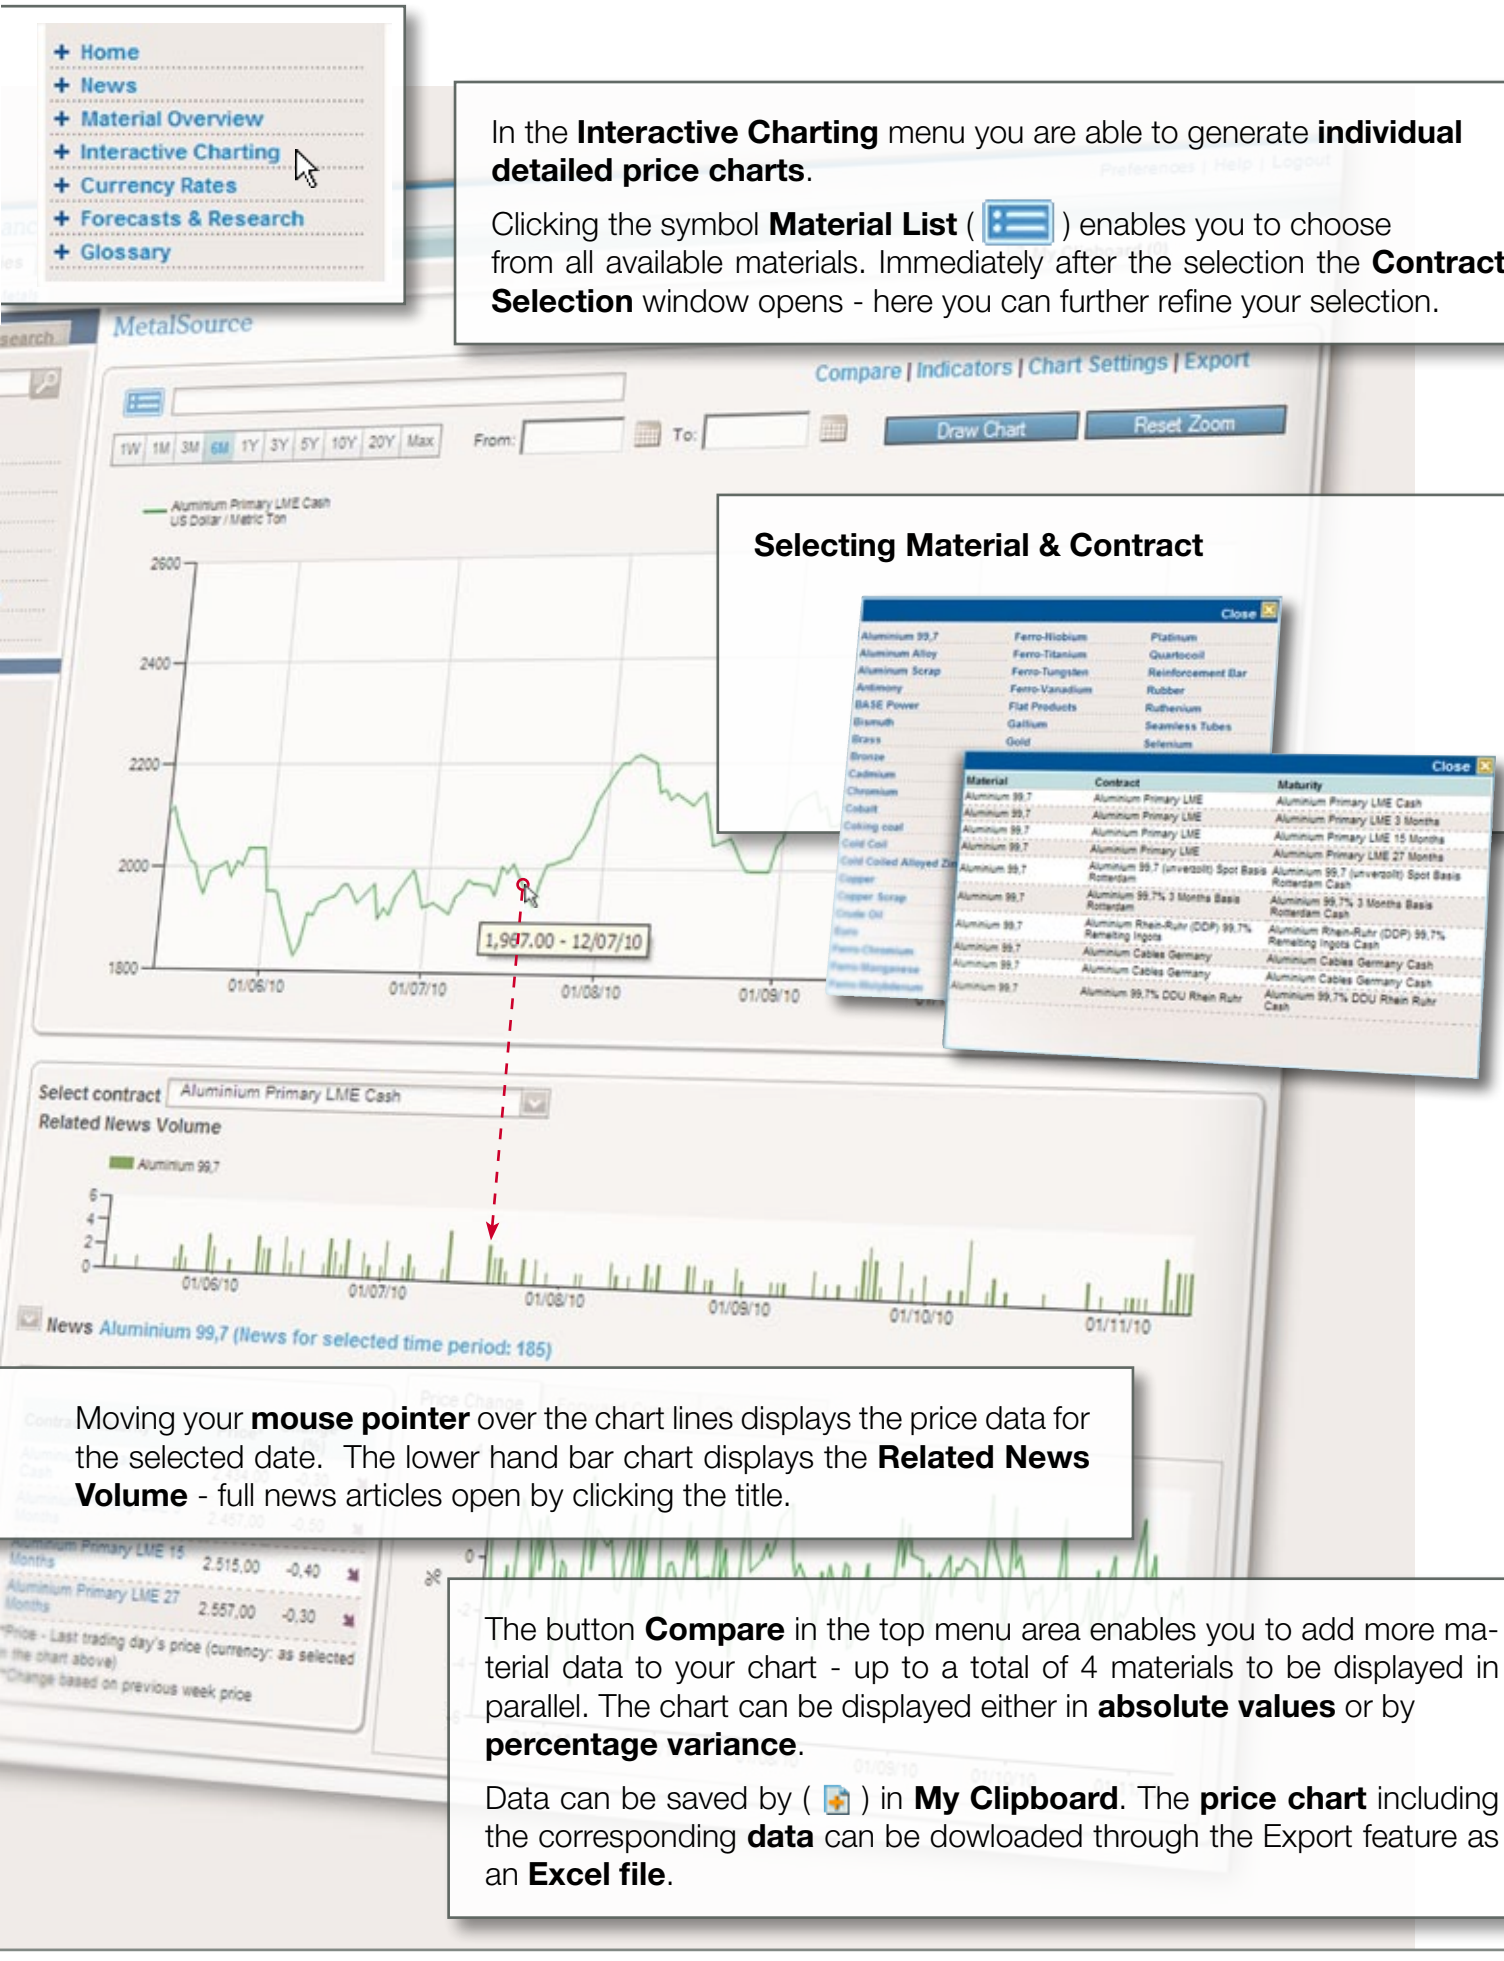
The **Material Overview** page gives you a quick overview of the entire metals market - structured by material groupings.

In the top menu area you can select a **timeframe** to display.
The **historic price** displayed is the chosen material's price at the start of the selected timeframe.

The same top menu allows you to select a **currency** in which all contracts in the material overview will be displayed.

Clicking on a **contract's name** leads directly to the MetalSource's area for interactive charting.



In the **Interactive Charting** menu you are able to generate **individual detailed price charts**.

Clicking the symbol **Material List** ( ) enables you to choose from all available materials. Immediately after the selection the **Contract Selection** window opens - here you can further refine your selection.

Moving your **mouse pointer** over the chart lines displays the price data for the selected date. The lower hand bar chart displays the **Related News Volume** - full news articles open by clicking the title.

The button **Compare** in the top menu area enables you to add more material data to your chart - up to a total of 4 materials to be displayed in parallel. The chart can be displayed either in **absolute values** or by **percentage variance**.

Data can be saved by ( ) in **My Clipboard**. The **price chart** including the corresponding **data** can be dowloaded through the Export feature as an **Excel file**.

Next to the **Material List symbol** ( ) you find a **search bar**. Here you are able to access all materials by typing in the full name or significant parts of the desired material's name. (shown example: steel)

Below the bar chart of **related news** you find a table of **contract validity periods** (including price changes from the previous week in percent) and a graphical illustration of the price change during the selected time period.

By clicking **My Clipboard** and then **Manage Clipboard Items**, found at the top of the menu, you can manage and sort all articles and data sets you have added ( ).
Creating one or more **folders** lets you save all data permanently.

LME And SGX To Launch Three Joint Metal Futures In Feb
MetalSource Non-Ferrous Metals,11/11/2010
LONDON (Dow Jones)--The London Metal Exchange and Singapore Exchange will jointly launch three new metal contracts in Singapore in February, the LME said Thursday. The contracts, for copper, aluminum and zinc futures to be traded and cleared exclusively on the SGX, will "enable investors to trade metals in Asia through SGX's wide distribution network of international and regional members," the LME said in a statement.
LME Gets Application To List Italy Steel Billet Calvisano Brand
MetalSource Steel,10/11/2010
LONDON (Dow Jones)--The London Metal Exchange said Tuesday it has received an application to list a steel billet brand called Calvisano under its steel futures contract. The billet is produced by Italy-based Acciaiere di Calvisano from a plant in Brescia. The plant is able to produce 700,000 metric tons of billet annually, the exchange said.
BASE METALS: Metals Down On Dollar Rebound But Further Gains Seen
MetalSource Non-Ferrous Metals,08/11/2010
LONDON (Dow Jones)--Base metals on the London Metal Exchange are Monday taking a breather from their recent rally as the U.S. dollar strengthens against the euro. "Prices remain focused on the dollar and are all off today as the dollar reverses the fortunes of last week," said Fairfax analyst John Meyer.
Anglo American To Sell Moly-Cop, AltaSteel For $932M
